- **Increase Reliability**
- **Improve Performance**
- **Find Underlying Problems**
- **Plan Future Capacity**
- **Reduce IT Overhead**
- **Improve Service Levels**

“The GSS E-mail Audit solved several problems and prepared us for future expansion.”

GSS E-mail System Audit

E-mail systems tend to grow organically over time. More applications are integrated with e-mail and functionality is added through 3rd party products. E-mail systems grow because companies gradually expand and because of mergers and acquisitions.

E-mail systems tend to become larger and more complex over time and in-house expertise can become highly compartmentalized or erode. Inevitably problems arise and IT organizations find themselves putting out fires without having the resources to research and resolve underlying problems that have crept in gradually.

IT is under constant pressure to improve the performance and reliability of e-mail despite system growth, increased

complexity, integration of new applications and demands for increased functionality.

Vendor documentation, technical support and sometimes product designs may not fit your real-world system. Vendor consulting services often lead to increased technology investments that may not give you the lasting solutions you need. General systems integrators are happy to help but the staff they send to your site are not industry experts and simply augment your existing staff.

The best way to cut through these issues is to call the real technology experts.

The Real Experts

Global System Services Corporation (GSS) has designed and deployed some of the largest and most complex e-mail systems in the world. GSS professional consultants include well-known industry experts and every customer receives personal attention from our Senior Partners.

Many of the largest corporations in the world have turned to GSS in the past because of its extensive experience and specialized expertise in e-mail and messaging technologies and systems.

GSS works with all major e-mail and messaging technologies and products including LAN e-mail and legacy systems, Lotus Notes and Domino,

Microsoft Outlook and Exchange, Sun ONE server products, Novell GroupWise, as well as Internet e-mail technologies such as sendmail and related Internet standards-based products.

GSS has a winning track record of successful e-mail solutions for many of the world's largest companies, including Fortune 500 corporations, government and military customers, and large service providers.

The Right Solution

GSS effectively combines tactical solutions and long-term strategies. GSS consistently helps customers find underlying problems and develop lasting solutions. A GSS E-mail System Audit can help you:

- Solve known problems
- Resolve causes of problems
- Find hidden problems
- Avoid potential future problems
- Enhance performance
- Improve reliability
- Reduce IT overhead and cost
- Optimize system design

GSS uses a comprehensive e-mail auditing methodology developed and proven in real-world systems ranging from small companies to multi-million

user service provider solutions. The GSS E-mail System Audit covers:

- Network and System Topology
- Network Load and Capacity
- Message Routing Topology
- Routing Logic and Protocols
- Internet Connections
- Administration Practices
- Backup and Maintenance
- Monitoring and Error Recovery
- Messaging Gateways
- Remote E-mail Access

You will receive a [GSS E-mail System Audit Report and Recommendations](#) document that provides you with a roadmap to success. With GSS you can take care of e-mail system problems once and for all.

Experience the Value

With GSS customers always know what they will receive, how much they should invest, and how long it will take to achieve their goals. Let GSS help you migrate quickly and smoothly to a superior e-mail infrastructure.

Over the years GSS has proven its value by helping customers successfully meet the most demanding IT

challenges. GSS has relationships with major vendors that involve training and certification of GSS staff, but the certification that GSS points out most frequently is customer loyalty. GSS is successful because GSS customers are successful.

About GSS

Established in 1994, GSS is a leading IT consulting firm focusing on technology strategy and IT architecture services.

GSS is a Qualified Lotus Business Partner, a Certified Microsoft Solution Provider, an iPlanet Partner, and a member of the Electronic Messaging Association (EMA) with certified experts on staff.

GSS provides an integrated suite of consulting services, including technology strategy, system architecture and design, capacity planning, and related development and implementation services.

GSS customers include Fortune 500 corporations, U.S. government entities, service providers, and software vendors.
